

Installation:

- 1- Type cmd in Windows search and type :adb install BlikkenslagerVRQuestV2.apk (If you are not in the same folder as the apk file just enter the full path and the file name e.g. c:\apps\BlikkenslagerVRQuestV2.apk)

```
Command Prompt
C:\Users\dragvoll\AppData\Local\Android\Sdk\platform-tools>adb install BlikkenslagerVRQuestV2.apk
adb server version (40) doesn't match this client (41); killing...
* daemon started successfully
Performing Streamed Install
Success
C:\Users\dragvoll\AppData\Local\Android\Sdk\platform-tools>
```

*If you are not familiar with adb or you don't have it on your pc yet use this link:
<https://headjack.io/tutorial/sideload-install-app-apk-oculus-go-quest/>

- 2- After you see the success line in the console, open the Quest folder and look for folder Android -> data -> com.IMTELNTNU.NAVBlikkenslager -> files -> WorkshopTasks
And copy all files in the zip file WorkshopTasks to this folder.
- 3- For running the app go to the library and unknown sources and choose NAV Blikkenslager.
